OUR PRODUCTS AND SERVICES

Your comprehensive partner
for digitization

Join more than a hundred satisfied customers
across Europe and become
one of them.

No matter what your business is,
you are right with us.

We will meet extreme requirements
even in extreme conditions.

MUNICIPALITIES, CITIES, PUBLIC GOVERNMENTS

Thanks to us you can communicate with your citizens quickly, simply and online. Promote local businesses, inform the tourists about points of interest in the surrounding area and much more.

GYM AND FIT CENTERS

Use our equipment to motivate clients. A virtual trainer, a motivational video for video for treadmill runners or treadmill runners or a virtual bike path will take the experience of visiting you to a new level.

TRANSPORTATION NODES

Information on arrivals and departures, current information on the traffic situation or a simple and clear map of the terminal. All of these are services that we already provide today at busy traffic locations and thus make life easier for thousands of passengers.

SHOPPING CENTERS

Are you opening a new store or holding an interesting competition? Let everyone who walks through the doors of your mall know about it. With our device, it's a piece of cake.

HOSPITAL

Let the public know about the partners who contribute to the running of your facility, or just make it easier for your visitors to find their way around. With us, you can do not only that, but also a lot of other things.

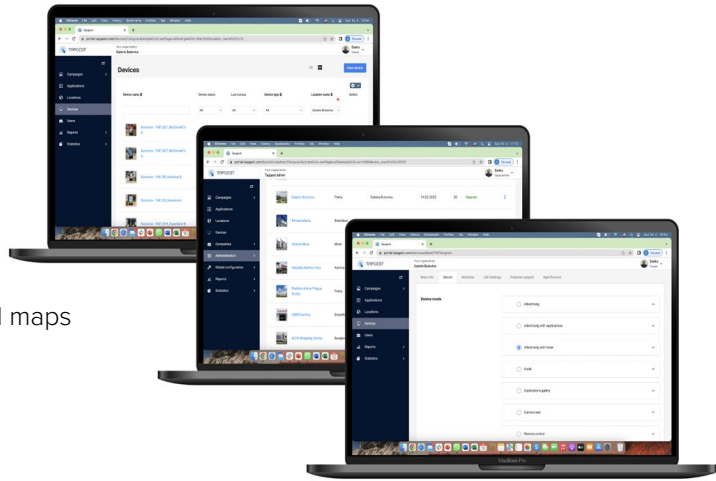

HOTELS AND OFFICE COMPLEXES

We will help you with better organization of accommodation for your guests, or simplify communication with your employees. Our screens are already used for this today.

SELF-SERVICE SOFTWARE

FOR REMOTE CONTENT
MANAGEMENT

A unique software solution **that enables simple and fast communication** with citizens of municipalities, customers of shopping centers or passengers at frequent traffic junctions. View news, updated maps or promote local businesses in real time. In addition, you can handle everything yourself without the need for our assistance, **which minimizes your costs.**

The devices are equipped with a unique fully sealed cover and are thus ready for outdoor use. **Water resistance and dust resistance are guaranteed by protection class IP55 to IP66.**

It also includes a smart heating system ensuring functionality **in extremely low temperatures down to -40C.**

The same system ensures trouble-free operation in temperatures **up to 50C thanks to the work with fans.**

LCD display readable in the sun in any weather conditions. Brightness from 1500nits to 3500nits. Thanks to the precise design, **the display does not suffer from undesirable phenomena such as blackening or fogging of the screen.**

size	One-sided free standing outdoor	Two sided free standing outdoor
32"	4.890,- EUR	7.790,- EUR
43"	5.690,- EUR	8.190,- EUR
49"	6.090,- EUR	10.190,- EUR
55"	7.390,- EUR	17.790,- EUR
65"	8.190,- EUR	15.090,- EUR
75"	12.290,- EUR	22.490,- EUR
86"	17.990,- EUR	32.690,- EUR

1. A smart system that adapts to external conditions.

The system itself regulates the temperature of cold and warm waste air according to the working environment. Thanks to this setting, it can operate in temperatures **from -20C to 55C.** The device itself adjusts the air temperature in the box to reduce undesirable phenomena such as blackening of the display at high temperatures or fogging in front of the screen.

2. Model with intelligent air conditioning unit.

Thanks to the integrated air conditioning, the device itself takes care of temperature regulation according to the external environment. It is thus adapted to work in extreme conditions **from -40C to 55C.** The device itself takes care of maintaining a favorable environment inside the box and thus minimizes undesirable phenomena such as blackening or fogging the display.

3. Entry costs at the lowest level.

The device with protection class IP55 is designed for fully outdoor and energy-efficient operation. The LCD display is equipped with hardened anti-reflective glass against glare and with a brightness of 1500 - 3500 nits ensures good visibility even in direct sunlight. Thanks to the built-in it can work in high temperatures **from -30C do 50C.**

4. Usability even in extreme conditions.

Thanks to the IP65 protection class, the device is ready for fully outdoor operation even in outdoor conditions. The LCD display with a brightness of 1500 - 3500 nits ensures good visibility even in direct sunlight. In addition, it is covered with tempered anti-reflective glass against glare, the Box contains an internal thermostat and a built-in air conditioner that dissipates heat. Thanks to this, it works in temperatures **from -40C až do 50C.** The device is designed to require less maintenance, reducing service costs.
