Digital signage software

The only gesture controlled digital signage software with scalabe app marketplace that is fully self-serviced.

Screenson
Applicable for any segment

Municipalities, cities, public governments

Thanks to us, you can communicate with your citizens quickly, easily and online. Promote local businesses, alert tourists to nearby attractions and much more.

Gyms and fitness centers

Use our equipment to motivate clients. A virtual trainer, a motivational video for treadmill runners or a virtual bike path will take the experience of visiting you to a new level.

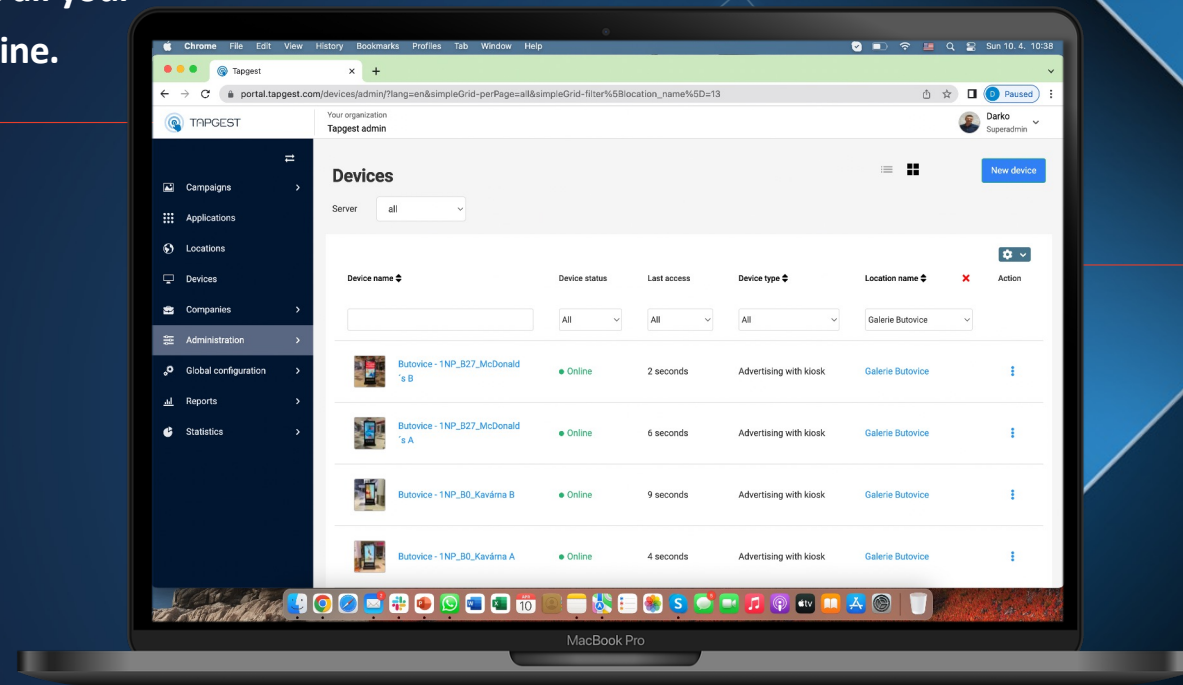

Transport hubs

Information on arrivals and departures, current information on the traffic situation or a simple and clear map of the terminal. All of these are services that we already provide today at busy traffic locations and thus make life easier for thousands of passengers.

## Applicable for any segment

SHOPPING CENTERS

Are you opening a new store or holding an interesting competition? Let everyone who walks through the doors of your mall know about it. With a device from us, it's a piece of cake.

HOSPITALS

Let the public know about the partners who contribute to the running of your facility, or just make it easier for your visitors to find their way around. With us, you can do not only that, but also a lot of other things.

HOTELS AND OFFICE

COMPLEXES

We will help you with better organization of accommodation for your guests, or simplify communication with your employees. Our screens are already used for this today.

Reports & statistics

- You can see high-level or low-level reports for screens and media: media name, media time, number of exposures per media, exposure time played and impressions of each ad.

- In seconds, you can see the general status of your screens and devices, online connectivity, recent playlist and time of content update and more.

- It's up to you what granularity of report you want to see - if you are interested in all screens, groups of screens or single screen.

- Analyze interactions with your interactive apps.
